

PRESS & MEDIA

A private chronology for moments that matter.

Notarus turns scattered notes, messages, photos, documents, and readings into a private, tamper-evident chronology and focused report the user can understand later and share selectively.

THE PRODUCT STORY

The useful record begins before someone asks for it.

01

Preserve

Keep the event, source material, event time, and preservation time connected.

02

Understand

Follow chronology and inspect source-linked patterns without making conclusions.

03

Share

Create a focused PDF or private hosted report for the next conversation.

QUICK FACTS

COMPANY	Notarus LLC
FOUNDER	Jameson Huckaba
BASED IN	Kansas City, Missouri
LAUNCHED	2026 - live on the web
PRICING	Free; Premium \$29/mo or \$249/yr

LIVE TODAY

- Private timelines for notes, photos, documents, readings, and other source material
- Event time, preservation time, SHA-256 record fingerprints, and visible corrections
- Focused PDF reports and private, expiring, revocable hosted sharing
- Report-level QR verification with narrow, explicit integrity limits
- Reviewed OurFamilyWizard PDF imports with source-page provenance
- Personal sobriety reporting with explicit No entry treatment

FOUNDER

Jameson Huckaba

Kansas City founder and systems engineer building software that keeps important context clear and useful.

IN DEVELOPMENT

- Evidence-linked Observations with visible calculations and counter-context
- Professional handoff and exhibit-packet workflows
- Additional source imports and selective collaboration tools

HONEST LIMITS

Tamper-evident, not tamper-proof. A fingerprint or QR check can match a report to its verification record; it does not establish truth, legal sufficiency, admissibility, or an outcome.
